

MYTHS & FACTS

Myth:

My pet will get fat and lazy.

Fact:

Most pets tend to get fat and lazy due to its reduced metabolism after neutering. Thus, the key is to give them enough exercise and not to overfeed, regardless neutered or not.

Myth:

I don't want my male dog or cat to feel like less of a male.

Fact:

Pets don't have any concept of sexual identity or ego. Neutering will not change a pet's basic personality. Pets are not likely to suffer from any kind of emotional reaction or identity crisis when neutered.

Myth:

I want my dog to be protective.

Fact:

Spaying or neutering does not affect a dog's natural instinct to protect home and family. A dog's personality is formed more by genetics and environment rather than by sex hormones.

Myth:

It's better to have one litter first.

Fact:

Medical evidence indicates just the opposite. In fact, evidence shows that females spayed before their first heat are typically healthier.

PET PLANET VETERINARY CARE

Operation Hours:

Monday – Thursday 9.00am – 12.00pm & 1.30pm – 6.00pm

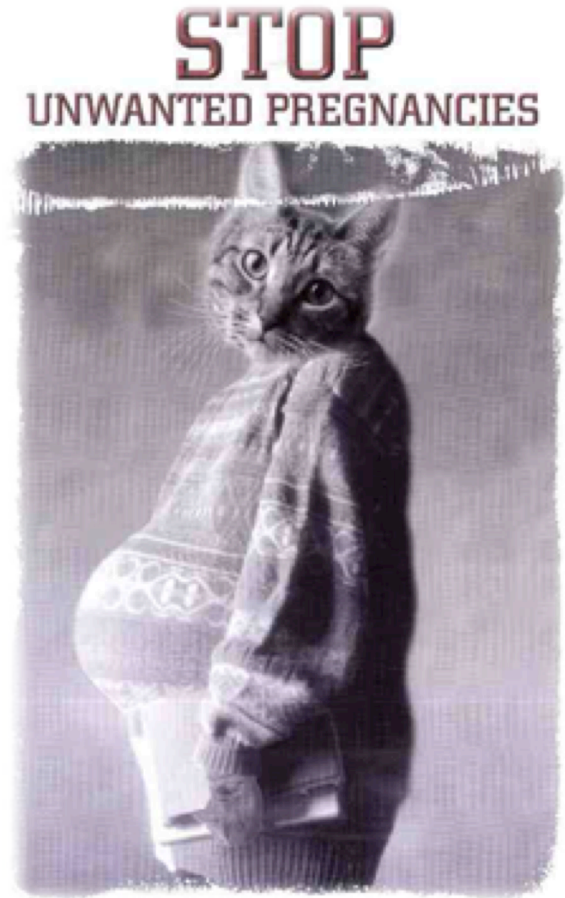

Friday 9.00am – 12.00pm & 2.00pm – 6.00pm

Saturday 9.00am – 12.00pm & 1.30pm – 5.00pm

Closed on Sundays & Public Holidays

Spay & Neuter

CATS & DOGS EDITION

What is neutering?

It is a surgical procedure to remove an animal's reproductive organs to prevent it from producing offsprings.

Males are castrated and females are spayed.

When to neuter?

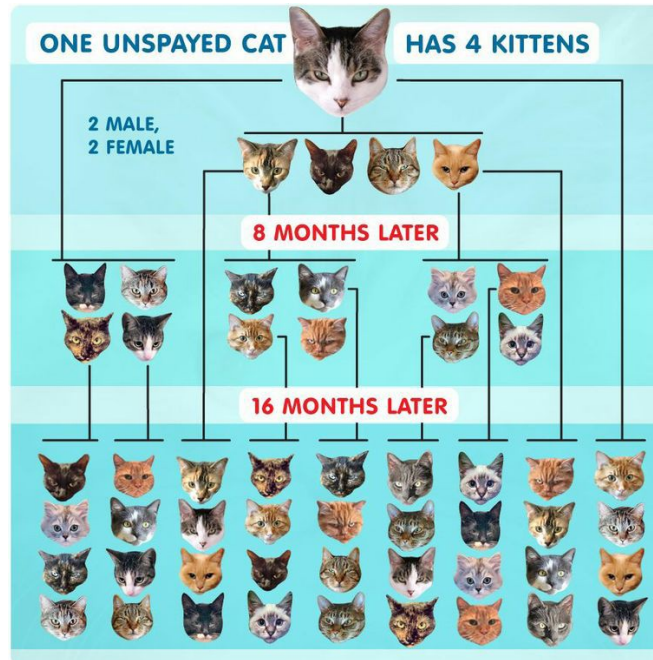

Cats and dogs can reproduce as early as 6 months of age. Neutering can safely be done by then.

We ask that you bring your pet in to us, in the morning with no breakfast. They will be anaesthetized, so they won't feel any pain during the procedure. Once recovered from the anaesthetic, they can go home that evening.

Kindly consult with our veterinarians and book an appointment with us in advanced.

What happens if I don't neuter my pets?

Consider the following scenario:

Similar to the case in dogs too!

Ask yourself this,

Do you have the means to care for them or to find them homes?

It is a known fact that there are a lot of stray cats and dogs wandering all around the streets. The majority of them cannot get sufficient food and are exposed to diseases and to the taunting and cruelty of heartless folks, and may end up maimed or dead from accidents.

Other Benefits

Reduce or Eliminate:

- Constant crying, yowling, restlessness and bleeding cycles (in dogs) when on heat.
- Foul odour from urine sprayings as a way of marking territory.
- Wandering and roaming in the streets in search of mates – only to come home being sick, carriers of diseases, victims of animal fights / bites and victims of road accidents.
- Aggression.
- Risk of tumors or cancers (testicular cancer in males and mammary tumors in females).
- Risk of uterine infections (pyometra in females).

Spay / Neuter is the Solution!

WHY SPAY AND NEUTER?		
<p>REDUCE SPRAYING & MARKING</p>	<p>REDUCE ROAMING</p>	<p>REDUCE AGGRESSION</p>
<p>LOWER RISK OF CANCERS</p>	<p>DECREASE OVERPOPULATION</p>	<p>INCREASE LIFESPAN UP TO 3-5 YEARS</p>
